DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7, 9-32 and 34-70 renumbered as claims 1-68 are allowed.

2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach a system, method and mobile terminal including a plurality of location processors wherein a controlling node transmits a control message to a mobile terminal in response to a location request message from a client terminal, the location request message containing requested accuracy of location information of the mobile terminal and the control message containing a copy of the requested accuracy, the mobile terminal being responsive to the control message for selecting one of the positioning methods that satisfies the requested accuracy of the control message and operating the location processor of the selected method to produce measurement data; wherein the mobile terminal has capability information indicating positioning methods supported by the mobile terminal and selectability of the positioning methods; wherein the controlling node is arranged to receive the capability information from the mobile terminal as recited in independent claims 1, 26, 52 and depicted in figure 5.

Prior art of record Guyot (U.S. Patent No. 7,016,693) teaches a client terminal capable of sending location request containing a specified accuracy for obtaining a location estimate of a mobile terminal (see col. 7 lines 47-65, col. 8

lines 15-32 and especially col. 8 lines 38-50) but falls short of teaching "the mobile terminal being responsive to the control message for selecting one of the positioning methods that satisfies the requested accuracy of the control message and operating the location processor of the selected method to produce measurement data; wherein the mobile terminal has capability information indicating positioning methods supported by the mobile terminal and selectability of the positioning methods; wherein the controlling node is arranged to receive the capability information from the mobile terminal" as recited in independent claims 1, 26, 52 and depicted in figure 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
